

Regensburg, 12 January 2021

Dear Valued Customer,

The outbreak and rapid spread of coronavirus disease (COVID-19) and the associated restrictions are currently impacting the world economy.

In this context, the Government of Malaysia has announced another Movement Control Order (MCO) for several states in Malaysia including Penang from 13 January till 26 January to address the again increasing number of new COVID-19 cases in the country.

Fortunately, semiconductors have been included as “List of Products that are Part of the Supply Chain of Essential Goods” and we will continue our operations in Penang, Malaysia. This means that our production in Malaysia will continue with no major impact, while following all the required safety measures and quarantine policies to protect our work force.

As the situation is still dynamic, circumstances may change due to factors beyond our control.

Therefore, we will continue to monitor the situation and if necessary, keep you updated with regards to new developments, as soon as possible.

Please be assured that we continue to strive to support you in the best possible way to secure your supply chains.

Yours sincerely,

Gunnar Klick
