

Regensburg, 1 June 2021

Dear Valued Customer,

The outbreak and rapid spread of coronavirus disease (COVID-19) and the associated restrictions are still impacting the world economy.

In this context, the Government of Malaysia has announced a new Movement Control Order (MCO) for Malaysia from 1 June until 14 June to address the again increasing number of new COVID-19 cases in the country.

As semiconductors have been included in the “List of Products that are Part of the Supply Chain of Essential Goods” we will fortunately be able to continue our operations in our factories in Malaysia.

This means that our production in Malaysia will continue with no major impact, while following all the required safety measures and quarantine policies to protect our work force.

As the situation is still dynamic, circumstances may change due to factors beyond our control.

Therefore, we will continue to monitor the situation and if necessary, keep you updated with regards to new developments, as soon as possible.

Please be assured that we continue to strive to support you in the best possible way to secure your supply chains.

Yours sincerely,

Gunnar Klick
