Eggtronic Appoints Excelpoint Systems to Support Rapidly Growing Demand in the Asia Pacific region

Agreement will deliver sales, logistics and support for advanced power technologies

Modena, Italy, Feb 1, 2023 – In line with its strategy of delivering high-quality local support to OEMs across multiple geographies, Eggtronic has announced the appointment of Excelpoint Systems as a franchised distributor for the Asia Pacific region.

Offering extensive coverage in China, ANZ, India and the ASEAN countries, Excelpoint has built a strong reputation in partnering with OEMs, ODMs and EMS companies to provide high-quality sales, logistics and support. As a franchised distributor, Excelpoint will play a key role in addressing the rapidly growing demand for Eggtronic's portfolio of highly innovative power technologies. These technologies include solutions for ultra-efficient AC/DC power conversion architectures and wireless power transfer (WPT). In China, all products will be supported, while in Asean countries, India, Australia and New Zealand, Excelpoint will support the Eggtronic WPT range.

Eggtronic's Vice President of Sales and Marketing, Michael Maia, comments: "We have seen a steadily growing need for our ultra-efficient and compact power conversion solutions across the Asia-Pacific region as manufacturers seek technologies to build more sustainable products that make better use of energy. We are excited to partner with Excelpoint to address that demand and ensure that customers get the best possible local sales, logistics and support for their innovative, next-generation designs."

Managing Director of Excelpoint Systems (H.K.) Limited, Alan Tan adds: "Excelpoint works closely with its principals to create solutions that address customer design challenges and we are excited to be able to add Eggtronic's advanced power technologies to our product line card, as well as give companies easier access to Eggtronic's innovative power architectures. We are delighted to work together with Eggtronic as the company expands its reach across the Asia Pacific region."
