Excelpoint adds new product line, Digilent Inc.

Excelpoint continues to expand its product offering with the addition of Digilent Inc., a leading electrical engineering company offering products and solutions that bring forth engineering and design innovation in the Artificial Intelligence ("AI") and Internet of Things ("IoT") arena.

Diligent has an outstanding reputation as a manufacturer with a global presence in distribution of FPGA development boards and test and measurement devices for industry and education sectors. With this product line added, Excelpoint will be able to offer customers quality solutions such as Eclypse Z7 and Genesys ZU to expand in industrial, consumer and Artificial Intelligence Internet of Things ("AIoT") segments, giving them significant cost savings.

Albert Phuay, Chairman and Group Chief Executive, Excelpoint Systems Pte Ltd says, "With this partnership, we can leverage on Digilent's FPGA solutions to delve deeper into computer vision and AIoT segments with powerful processing, multimedia and network connectivity on board. Diligent's solutions will also enable the next-generation wired and 5G wireless infrastructure, cloud computing, AI, aerospace and defense applications throughout Southeast Asia, Australia, New Zealand and India with our distribution."

For nearly two decades, Digilent has provided engineers and embedded developers with a diverse offering of high-quality FPGA-based systems, tools, and technologies at cost-optimized value, along with an ever-expanding library of rich content available as a resource for all. Their customisable and flexible solutions are both accessible to advancing engineers.

"We are looking forward to our new partnership with Excelpoint and benefiting from their vast regional networks, as well as their experience and value-add in the distribution field. We're excited to watch our business grow in Asia." says Steve Johnson, President of Digilent Inc.

Regional coverage

Southeast Asia
Australia
New Zealand
India

Segments

Industrial
Consumer
AIoT

Applications

Edge AI cameras
Robotic Vision
Monitoring and Security
Smart Cities

About Digilent Inc.
Digilent Inc, a National Instruments company, is a leader in the design, manufacture and worldwide distribution of FPGA development boards and Test and Measurement devices for both industry and education.
